

Send LOCSTAT Over!

Maser Technology Group's SATracker-P is a personal, rugged, wearable, secure GPS tracking device designed to ensure commanders, concerned about troop safety, can pinpoint the location of soldiers during training activities in remote areas.

Using readily available commercial satellite services, SATracker-P regularly updates Exercise Controllers on the whereabouts of all personnel and equipment in the AO.

CUSTOMISED SOLUTION

Australian designed and built, Maser will customise the GPS tracking solution to meet your specific requirements.

SATELLITE NETWORK

The tracking information is carried via SMS across the Globalstar satellite network.

MAPPING

The tracking and location data can be displayed on Google or Raster maps.

RECHARGEABLE BATTERIES

4 x rechargeable batteries provide a minimum of two weeks use.

WARRANTY

Each tracking unit has six months warranty.

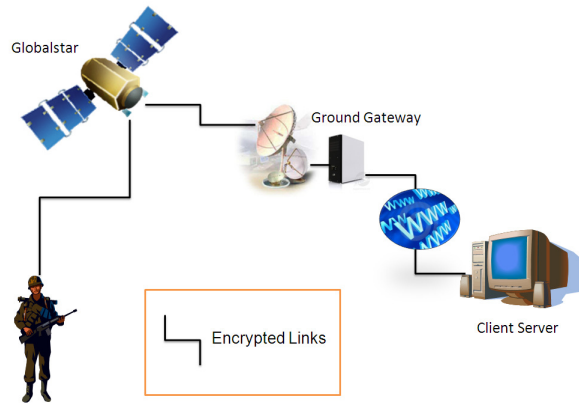

KEY ADVANTAGES

- Customised solution
- Secure
- Simple
- Economical
- Rugged
- Total ownership
- Various sensor options
- Australian designed and manufactured.

SATracker-P Features

Communications Network

- 20 channel SirFIII GPS
- Simplex satellite transmitter
- Microprocessor
- Internet FTP transmission
- SMS Transmission via Pivotal Globalstar satellite back to the client server
- Internal antenna
- 4 x rechargeable batteries
- IP 66 casing (higher rated casing available)
- Duress alarm button
- Geo-fencing alert options
- Real time clock for power save mode

SATracker-P fits neatly in an AUSCAM compass pouch, meaning it can be easily attached to a soldier's personal equipment. Each device can be pre-programmed as per a client's requirements, with power save mode, on/off on demand or by motion, geo-fencing and time reporting features. The tracking information is transmitted by SMS, at specified times, over the Globalstar network and displayed on the client's computer using 'Maphound' software.

Supporting Software

- Windows based 'MapHound' tracking software to be installed on client server.
- Each tracking device will be programmed in accordance with the client's requirements.
- Software Development Kit can be supplied.
- 'MapHound' uses Google or Raster maps.

SERVICES AVAILABLE

- Customised tracking solution
- Technical Support
- Installation and Setup
- Application Support
- Hardware Support
